

EH Series Proportional Electro-Hydraulic Pressure Control Valves

SB1110-※-20

SB1190-※-20

————— Notice of Paint Change —————

We are pleased to announce that Proportional Electro-Hydraulic Pressure Control Valves will receive phosphate coating treatment of the surface instead of standard painting.

■What Changed

In recent years starting with PRTR regulation^{Attn.1)} there have been demands for strict measures to preserve environment. Painting works has largely affected environment and humans. Reduction of paint volume has been a big issue. Under these circumstance we have decided to discontinue painting and proceed with phosphate coating treatment of the corresponding product in order to decrease the effects on environment and humans.

This modification will not result in a model change and current design will stay as it is.

Attn.1) PRTR : is an abbreviation for Pollutant Release and Transfer Register. Its goal is promotion of awareness for management of chemicals among manufacturers through the improvement of related legislation to monitor and control the amount of exhaust of special chemicals and avoid environmental assistance before it becomes necessary.

■Affected Models

The change affects following models of EH Series Proportional Electro-Hydraulic Pressure Control Valves.

■Timing of Release

Name	Model Number	Timing of Release
EH Series Proportional Electro-Hydraulic Pressure Control Valves	SB1110	With October 2018 manufacturing
EH Series Proportional Electro-Hydraulic Pressure Control Valves	SB1190	With October 2018 manufacturing

(There might be mixed shipments of painted products and phosphate coating treated products until the depletion of current stock of painted products)
