

Needle Valves GCT-02-34 / GCTR-02-34

————— Notice of Model Change —————

We are pleased to announce that GCT/GCTR-02 underwent a model change due to the transfer of production base.

■Description of Change

Following the transfer of production base for GCT/GCTR-02 we have made changes in the shape of the cast iron bents, name plate shape, and name plate mounting method in order to improve the manufacturing process. Dimensions and specifications stay the same, however the design number has been revised from the product management perspective.

Model Number After Change	Model Number Before Change
GCT-02-34	GCT-02-33

■Interchangeability

Dimensions and specifications stay the same with this model change. (Please, refer to page 2 for the details on shape modifications that do not affect dimensions)

Product number has been changed due to the transfer of production base. There is interchangeability in general. However replacement of the needle and handle set is required.

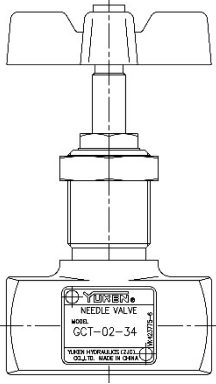

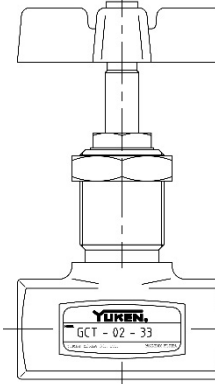

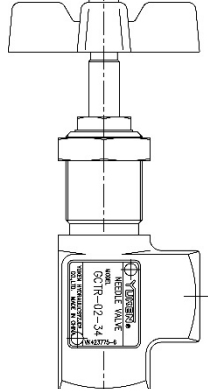

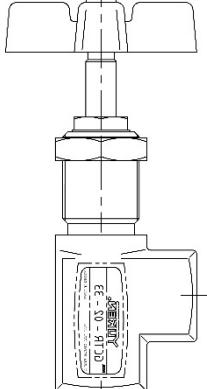

■Timing of Release

Gradual release with shipments to start in December 2018

(There might be adjustments due to the amount of the old design products in stock)
