

## Pressure Sensors

### Notice of Model Change

We are pleased to announce the model change of the product to the 20-design for the following reasons.

#### Reason for the change

Switching to an alternative due to discontinuation of production by the sensor supplier.

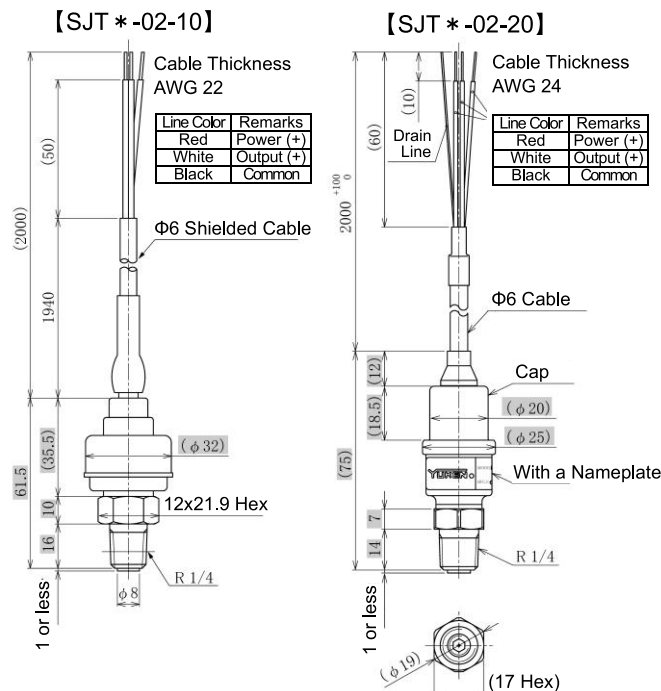

#### Changes

Item	Old 10 Designs	New 20 Designs
Model Number (Pressure range)	SJT20-02-10 (0~20MPa) SJT35-02-10 (0~35MPa)	SJT20-02-20 (0~20MPa) SJT35-02-20 (0~35MPa)
Power Supply	DC 5.0±0.5V	
Output Range	0.5~4.5V	
Mounting Interchangeability	Interchangeable	

- The design number will be changed from 10 to 20.
- The output range is shown at a supply voltage of 5.00 V. The output is proportional to the supply voltage.
- The sensor connection diameter (R1/4) is the same for the old and new models, but the external dimensions are different. See Figure 1 for details.

#### Timing of Release

Upon depletion of current stock.

Note: Shaded area in the figure...Dimensions have been changed.
